*WATCH THE PASSING OF THE SEASONS,*  
under the shelter of your own design ...

*TAKE CONTROL* of the use of your pool or spa, with Solar Innovations' Pool and Spa Enclosures. Our advanced-formula thermal breaks create a barrier between your enclosure and the outside world. Various glazing options allow the charm and beauty of *Mother Nature* to come in, while keeping out snow, wind and rain.

*SUPERIOR DESIGN & INNOVATIVE CONSTRUCTION* help make Solar Innovations *a leading manufacturer* of pool and spa enclosures, both large and small.

- We use a non-corrosive aluminum framework and stainless steel fasteners, which stand the test of time in the high humidity, chemical-filled environment of a pool or spa enclosure.
- Efficiency-enhancing ridge vents, doors and windows allow for proper ventilation and climate control, and our gaskets are made of a special non-shrink core that minimizes leaks and air infiltration.
- Our double-paned, insulated glass is 1" thick vs. the competition's 7/8" thick design (a 14% increase in depth for added efficiency), and our 3/16" glass measures 50% thicker than our competitors' 1/8" glazing.

*These thermally broken design specifications add up to increased R-values while simultaneously decreasing U-values.*

*OUR PRODUCTS* come in any size, shape or color. These custom designed systems are priced comparably to our competitors' standard offerings. We can meet any wind or snow load requirement, and we offer high-performance tinted glass or polycarbonate. That, combined with a 10-year warranty on all extruded parts, makes Solar Innovations *the obvious choice for any decorative or functional need.*

### *POOL & SPA ENCLOSURE ISOMETRICS*

The following isometrics are a basic sampling of the design options offered by Solar Innovations. Combinations of designs and accessories create countless variations in appearance. Specifically, lantern, hip and valley, radius patterns, truss and other irregular polygonal designs are available upon request. We also offer French, sliding, and inswing doors, transom bands, ridge vents, multi-bay sliders, casements, awnings, and circulating fans.

**SOLAR INNOVATIONS' DESIGN TEAM**  
can help create a custom pool or spa enclosure to meet your needs.

**Form and Function:**

Solar Innovations' aesthetically pleasing enclosures provide year-round use of your pool or spa.

**Design and Purpose:**

Remain sheltered from the elements and enjoy the natural beauty of your surroundings.
